

Rugged Portable Computers

The AFPW1730 is a robust, lunchbox computer that is built using heavy-duty metal. With rubber bumper corners for added protection and an anti-glare tempered glass, it is a tough, go-anywhere unit that is ideally suitable for harsh and severe environments.

With passive backplane board configurations and 7 full-length expansion slots, the AFPW1730 can be freely configured and uniquely designed for most applications.

Each unit comes equipped with dual system cooling side fans and easy access to its expansion ports for immediate system upgrade or maintenance. Functional practicality combined with its elegantly simple design make the extra-rugged AFPW1730 the most cost-effective, durable, and versatile portable solution for your mission-critical applications..
