Introduction

ATEN's KVM on the NET is an IP implemented KVM solution that allows network administrators to access computers from any station connected to the network, whether from the LAN, WAN, or the Internet. Network administrators can enjoy freedom from being bound to the server room; work from anywhere in the office, remote locations, or even from home!

Since KVM on the NET uses TCP/IP as its communication protocol, network administrators can remotely access attached KVM switches, allowing remote control of the attached servers to perform many tasks with ease and speed, such as installing and running GUI applications, BIOS level troubleshooting, routine monitoring, system maintenance, system administration, and rebooting. It supports 10Base-T, 100Base-T, and TCP/IP. The server can be accessed whether it is down the hall, on the other side of town, or thousands of miles away!

Utilizing advanced security technologies, KVM on the NET provides password protection, advanced encryption technologies, sophisticated user filters and management, stealth mode and automatic lockout to make sure that remote access is secure.

Also, KVM on the NET offers high resolution (up to 1600 x 1200 @60Hz), user-friendly Windows GUI Client Software and Java client software.

Features

- Remotely control your servers via the LAN, WAN, or the Internet
- Supports 10Base-T, 100Base-T, TCP/IP, and HTTP
- Works with most KVM switches
- No licensing required
- Sophisticated Administrator software allows setup for network, security, and user management
- Advanced security features: password protection, advanced encryption technologies, sophisticated user filters and user management, stealth mode and automatic lockout
- User-friendly client software allows for video adjustment, bandwidth control and mouse synchronization
- High video resolution: up to 1600 x 1200 @60Hz
- Windows GUI and Java based client software; Java client works with all operating systems
- Upgradeable firmware
- 3-year product warranty

Accessories

- Cables included
- Compatible with:
- 16-Port High-Density KVM Switch (model KH0116) see page 12
- 16-Port LCD Console KVM Switch (model KL0116) see page 14
- 32-Port Matrix KVM (model KM0432) see page 18
- 16-port Matrix KVM (model KM0216) see page 18
- MasterView™ Plus w/ OSD (model CS138A) see page 25
- MiniView™ 8-port KVM Switch (model CS88A) see page 25

IP implemented Remote Server Control via LAN, WAN, or Internet
