

HD USB Digital Signage All-in-one Media player, 22"
Widescreen diagonal screen, 1920x1080 resolution
Model: BBD2200USB

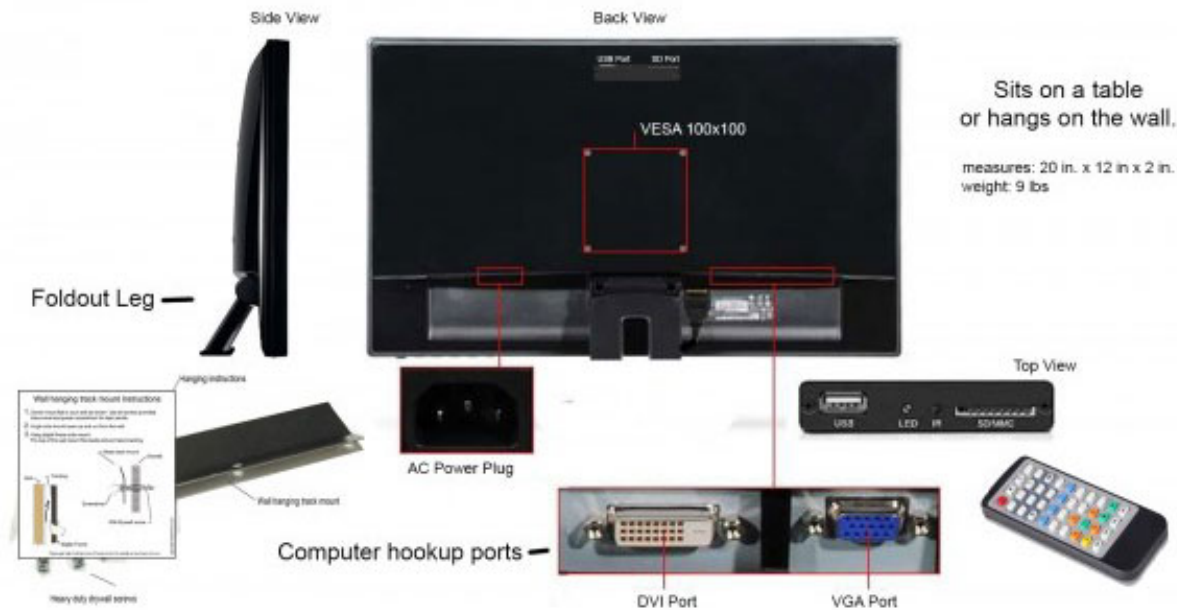

Introduction

Bring new life and fun to your digital pictures. All frames can sit landscape style. They can also hang portrait or landscape style with the included wall mount. This complete frame has a resolution of 1080p and the recommended image size is 1920x1080. Use a USB memory drive to play your photos or video. This screen can play your photos or videos with a few button pushes from the included remote. It will repeat your images or video in a looping slideshow. USB or SD memory card remains attached to the frame while media is being played.

It comes with a 40 inch cord out the back, 1 year warranty, internal speakers, media remote control, and a free wall hanging track mount. Check out our accessory section if you need anything to go with your digital frame. All models are made in Nashville.

note* WiFi frames are wifi only and do not use a usb for your images. You must upload your media to the internet or stream from a local network.
