

Blackhawk Series Portable Console 17.3" Display, 1920x1080 Resolution, 2 standard USB KVM console ports, 2 CAT5 KVM Extender, 300nits, 105-key cherry switch keyboard with touchpad 3" x 16.5" x 13.5" (H x W x D) / 13.5 Lbs

Model: BHKW1730-Ce

INTRODUCTION

With iTech Company's BHKW1730-Ce, you are now able to simplify IT duties with an easy-to-install monitor and keyboard for your server set up. This is a great solution for interfacing with server racks while eliminating the limitations of a stationary rack-mounted KVM. It is ruggedly built and can endure harsh environment operations. It is also lightweight and easy to carry, with fold and lock design for convenient storage anywhere.

Remotely Control Computers

Sometimes, there is no room for a server or you want to put all your computers in a safe place. Set your BHKW1730-CE at a convenient and suitable control field over an already existing network construction. With this unit, you can remotely control systems up to 500 feet away.

Access Up To 4 Computers

The BHKW1730-CE enables users access up to four computers, servers, or KVM switches at the same time. Two connect with the traditional KVM cables and two connect with the help of the CAT 5 transmitter up to 500 feet away with superior auto adjust RGB gain/delay control capability

FEATURES

- 2 standard USB KVM console ports, 2 CAT5 KVM Extender
- Compact size and lightweight design with fold and lock mechanism
- High resolution for crisp and clear display
- No software needed
- 105-key cherry switch keyboard with touchpad
