

RACK SCREWS W/WASHERS

AMERICAN
MADE 

The Kendall Howard Rack Screws with washers are not your everyday hardware store item. The superior American-made quality should be your only choice for securing rack mount devices such as shelves, cable managers, servers, and other network, A/V and electronic equipment.

- 0.75" in length
- Phillips truss head
- Packaged in an aluminum tin (not bulk packs)
- RoHS Compliant
- Made in the USA

FEATURES

Dog/Pilot Point - The straight pointed section below the thread helps to self-guide the screw to prevent accidental stripping while also improving the ease of installation.

Phillips Truss Head - Truss head screws can be installed with one of the most universal tools on the market. Requires only a Phillips head screwdriver or bit.

Compatible Rail Systems - Kendall Howard rack screws can be utilized in any tapped rail system. They can also be installed in universal cage nut style rails when used in conjunction with cage nuts.

Superior Manufacturing - The cold hardened steel construction produces a high-quality finish with excellent dimensional stability. We then take it one step further and finish them with a black oxide coating so the screw blends with most standard black network racks, cabinets, and accessories.

Protective Delrin Washer - Distributes the pressure of the screw head more evenly to prevent damage or scratches to your rack mountable devices.

10-32 Rack Screw W/Washer Specifications
