

MODULAR WALL MOUNT RACKS

Pictured shelf not included

Kendall Howard's Modular Wall Mount Rack was the first of its kind! It did not take long for this rack to become the standard that all wall mount racks are measured against. The two-piece design offers unlimited flexibility. This innovative design can adjust to any width so it can house either 19" EIA or 23" EIA rackmount equipment. The generous 18" depth has enough room for cables, switches, routers, and so much more. Whether you are mounting it under a desk, on a wall, or to the ceiling, the Modular Wall Mount Rack is perfect for any application.

FEATURES

Two-Piece Design - The unique design allows you to choose the width. With equipment widths continuing to change, the two-piece wall rack can adapt to suit your needs.

Heavy Duty - Pure ingenuity and heavy gauge steel construction give this wall mount rack its impressive 350 lb. weight capacity.

Gangable - This modular wall mount rack can grow with your network. If you need more rack space, just gang two units together vertically.

Standard Tapped Rails - The pre-tapped mounting rails can be utilized to install network and other rackmount equipment with the use of 10-32 rack screws.

Easy to Install - With the use of the included wall mount template, installation takes less than five minutes!

- *Pictured shelf not included*
- 18" maximum depth
- 350 lb. weight capacity
- EIA 310-D compliant
- Made in the USA
- Limited Lifetime Warranty
