

2U RACK HELPER

The product that started it all - the Kendall Howard Rack Helper is a truly innovative product. Acting as a second set of hands, the Rack Helper perfectly places and supports network, A/V, and other equipment during installation. This 2U rackmount component makes installing heavy rackmount equipment a snap!

- Huge time-saver
- Easily install heavy equipment
- 200 lb. weight capacity
- Made in the USA
- Limited Lifetime Warranty

FEATURES

Time-Saver - Stop running around looking for someone to hold up your servers, UPS's or other heavy rackmount equipment during installation. Turn your labor intensive installations into an easy one person task with the assistance of the Rack Helper.

Easy to Use - Simply install the Rack Helper in the rack space below the desired location of the heavy device. Next, slide the rackmount component on top of the Rack Helper, and secure using the correct mounting hardware. Then remove the Rack Helper to be used again and again during other installations.

Added Support - Leave the device installed for peace of mind. The Rack Helper can also be used to permanently help support crucial and expensive equipment.
