Subject: Volatility Statement of NK-1e Keyboard Drawer

The table below shows the corresponding memory types for the Netview keyboard drawer. Please note, there are no remnants of customer data retained in the drawer when the power is turned off.

MEMORY TYPE	MEMORY SIZE	VOLATILITY	USER DATA*
FLASH	1024KB	Non-Volatile	No
EEPROM	1KB	Non-Volatile	No
ROM	4KB	Non-Volatile	No

Note:
(1) Flash is used for display board firmware code upload and contains no user data.
(2) EEPROM is used to store display board operational parameters and contains no user data.
(3) ROM is used to store keyboard operational parameters and contains no user data.

Sincerely,

Francis Hui
