How to Reset KVM Password on
USB/ Combo Version

How to Reset KVM Password on USB/ Combo version

1) The KVM password can be reset on the KVM PCB board
2) Open the KVM top metal cover
3) Find the jumper **J7**, then use either paper clip or scissors to touch the two boxes of J7 in order to close/short the jumper 5 ~ 10 second
4) The user name & password can be reset to default " **00000000** " (8 digit of zero)
